

OMX Solutions Pty Ltd – Company Announcement

June 24, 2020

Prostheses List – Granting of Application for TriFix™ Plating System

OMX Solutions Pty Ltd is delighted to announce the inclusion of its' latest custom-made medical device (CMMD), the **TriFix™ plating system**, on the Prostheses List. The Prosthesis List and TriFix™ plating systems listing becomes effective on 1 July 2020. The news follows on from the March inclusion of the TriFix™ plates in the Australian Register of Therapeutic Goods (ARTG) published by the Australian Therapeutic Good Administration (TGA).

The TriFix™ plating system is a custom designed medical device used for the fixation of craniomaxillofacial (CMF) fractures and osteotomies for both reconstructive and cosmetic purposes. Product benefits include its custom anatomical design and fit and the OMX Solutions' TriFix™ triple fixation technology. The TriFix plates offer greater strength compared to an off-the-shelf pre-bent CMF plate and can also be used to avoid using a fibula graft.

The intended use of the individually designed custom-made plate is for the fixation of fractures and osteotomies of both the maxilla and mandible. The system includes a custom-made, Titanium Ti-6Al-4V (Grade 5), fixation plate, fixation screws, a drill bit, driver blade and handle.

About OMX Solutions Pty Ltd:

OMX Solutions Pty Ltd specialises in custom-made medical devices (CMMDs) for cranio-maxillofacial surgery applications. Since its establishment in 2016, the company embraced the 3D printing digital revolution and has a growing portfolio of medical implants including a custom TMJ joint replacement prosthesis, bespoke plating systems, bio-models, surgical splints and guides. Headquartered in Melbourne, OMX Solutions is an Australian owned company with a goal to be the world leader in the development of exciting new customized and personalized surgical products and devices that will become game-changers in Craniomaxillofacial surgery.
